

1.0_General Information

Role Position:	Digital Coordinator
Technical Level:	Level 2
Department:	Operational & Technical
Sub-Department:	Digital
Direct Line Management:	Senior Digital Lead Digital Lead
Department Responsibility:	Operations Director

2.0_Role Description

As you have come from either an Architectural, Structural, Civil or HVAC/MEP background, with exposure through work placement & considered an intermediate level of experience. With your diploma &/or degree & the knowledge of your technical discipline background, your enthusiasm to learn all things Digital, while also having an open-mind for learning, adapting digital challenges to real-life projects places you in a position of exponential growth.

With your enthusiasm to obtain & also share knowledge of the digitally-related & BIM process, sets you aligned for the role & position of Digital Coordinator, Level 2 for an extensive challenging career.

3.0_Technical Assessment

There are **(10)** Technical Disciplines that are potentially considered relevant to your previous theoretical &/or practical knowledge, that form part of DCMvn & these are as follows;

ARC | STR | CIV | HZG | KLT | RLT | SAN | SPR | ELT | MSR

You are expected to have knowledge of your major & the potential of knowledge across other disciplines. Your experience & knowledge of these disciplines is primarily based on the ability to work with the native platforms, delivery of tasks, etc. & not just the actual technical aspect of the discipline itself.

DCMvn's expectations are that a maximum of **(7)** various disciplines are to achieve an Intermediate **(I)** level in terms of the rating system for the overall role of a Digital Coordinator.

There is a rating system based on knowledge being;

B = Beginner | I = Intermediate | E = Experienced

The requirements for this role & position are as follows:

B = Up to 7

I = 3

E = 0

These disciplines are assessed by your respective Direct Line Management (Senior Digital Lead | Digital Lead).

4.0_Responsibilities_Hard Skills

Hard Skills: Teachable skills or job-specific abilities that can be measured & quantified.

In this position your responsibilities relating to Hard Skills should be aligned to the following:

- The ability to use Autodesk Revit as the companies' primary Design, Modelling , Coordination & Documentation Platform.
- Successfully achieved a score of 95% or greater in (2) DCMvn KnowledgeSmart Revit Fundamentals Test.
- Successfully achieved (1) Autodesk Certified Professional Accreditation for an Autodesk platform.
- Successfully achieved BIM ISO19650: BIM Essentials Certification (BRE Academy or equivalent.)
- The ability to use remote-working-access environments, required for the undertaking of your prescribed work & responsibilities.
- Exposure to other supportive software & minor skills in platforms i.e. AutoCAD, Dynamo, Navisworks, Programming languages (C#, Java, Python, etc.), BIM360 platforms, Word, Excel, PowerPoint, etc., which shall compliment your abilities within the company.
- The knowledge & practical skills in utilising & working with our preferred coordination & collaboration platforms (Revizto &/BIMCollab).
- Knowledge about Digital & BIM Delivery, theoretical exposure & a large amount of practical delivery.
- The professional use of the English language is critical in your career, both written & verbal forms will be assessed formally; Productive (speaking & writing) & Passive (listening & reading). The level of achievement is based on the GSE (Global Scale of English) rating system - This Technical level requires you to have achieved a score of 23-29 points & a rating of A1 (or equivalent.)

5.0_Responsibilities_Soft Skills

Soft Skills: Individuals social ability to & how they relate to & interact with other people.

At this Level your responsibilities relating to Soft Skills are considered intermediate as a full-time employee. The **(10)** Soft Skills that you are to develop within the DCMvn are as follows:

1. Time Management

How to assess, plan & execute your tasks within a set time frame.

2. Emotional Intelligence

The act of assessing, acknowledging & controlling emotions between personal & professional issues.

3. Continuous Learning

Having the attitude of an open mind, allowing you the possibilities to learn processes for the first time or to re-learn things relating to previous tasks.

4. Adaptability

The confidence to be able to adjust/modify your abilities within your responsibilities to go with changes, both within the project & the company environments.

5. Collaboration & Teamwork

The ability to work and collaborative within a “team-environment”, showing support & respect to all fellow team members, regardless of the role, responsibilities or technical Levels.

6. Resilience & Curiosity

Having the ability & professional capacity to bounce-back & recover quickly from any professional challenges presented. Also the strong desire to know “how” things are created & the willingness to learn about things within the company.

7. Coaching Mindset

Having an open mind to always be in a learning-mindset, with the ability to not only learn but also teach others within the company & share knowledge obtained, so that we grow individually, but also collectively.

8. Project Management

The application of processes, methods, skills, knowledge & experience to achieve specific project & company objectives, according to the agreed criteria & deliverables.

9. Creativity

Using your imagination of original ideas to create & develop processes within DCMvns’ working environment, the inventiveness of re-inventing or developing past/current ideas/processes into something better.

10. Critical Thinking & Problem Solving

There are (8) main points to consider when applying Critical Thinking & Problem Solving to your role:

- Gather all information.
- Understand & define all information obtained.
- Question the methods by which the facts have been produced, along with the conclusions obtained.
- Look for hidden assumptions & biases amongst the information & results.
- Question the source of facts obtained.
- Don't expect all of the answers to be found.
- Examine the overall process & look at the “big-picture”.
- Understand your own biases & values.

6.0_People Management

At this Technical Level the lessoned learnt previously under your direct line management of your Team Lead, relating to working team environment has put you in a position to be able to assist in self-management of tasks. Even though you won't have any authority or management of other people within your team, these invaluable lessoned learnt will bring you into alignment of the working culture of DCMvn.

7.0_Qualifications, Knowledge & Experience
